SELKIRK CANADA EARNS ISO 9000 CERTIFICATION

Selkirk Canada attained accreditation to ISO 9001:2000 for its Quality Management System applicable to the design and manufacture of chimney, venting and fireplace products.

This quality system gives our employees a systematic method for continuous improvement by establishing a reliable way to take actions toward improving products and services. As our business continues to evolve, we recognize that our customers' expectations of quality will only become higher.

Selkirk Canada is committed to meeting and exceeding its customers' expectations for quality products and services. This quality objective can be achieved only if everyone in our organization is involved.

Selkirk Canada is a leader in the Chimney, Venting and Fireplaces product categories and operates three Canadian manufacturing facilities to serve the Commercial/Industrial, Wholesale, Hearth, and Retail markets. Headquartered in Stoney Creek, Ontario, Selkirk Canada Corporation has been a leading manufacturer of chimney, venting, and fireplaces for more than 72 years. Selkirk also manufactures products in the United States and Mexico with corporate headquarters in Dallas, Texas. For more information, visit www.selkirkcanada.com.
